- Application Design & Creativity
- Coding & Problem-solving
- Communication Skills
- Security Systems
- Time Management

Hobbies

- Reading Books
- Traveling
- Explore new technologies

Interest

- Cyber Security
- AI
- Automation

Language

- English
- Bengali
- Hindi

Experience

Cyber Help India Pvt. Ltd. (Siliguri) *May 2024 - Oct 2024*
Jr. Software Developer
At Cyber Help India I've created custom robust web apps (using PHP) for clients, to manage their businesses like Tourism, Stock Management, Appointment Management, Travel Package Manager, Car Rental Sites, School Management Web Apps, Booking Engine for hotel owner etc.

Personal Projects

Inventory Management System *November 2024*
The Inventory Management System (IMS) is a web platform that streamlines product, order, supplier, and payment management. It automates stock tracking, order processing, and provides real-time data access, enhancing inventory accuracy and operational efficiency.

Task Management App *October 2024*
A Task Management application built with **Next.js**, **MongoDB**, and **NextAuth**. This application allows users to manage tasks, view statistics, and update task statuses. Admin users can view additional statistics such as task distributions and tasks assigned to different users.

The Educative *September 2024*
A content platform featuring topic-based blogs and resource management was developed. User and Admin panels were created using **Next.js** to ensure efficient content handling.

QR Attend *April 2024*
A secure, three-layer verification system was integrated to enhance data security. The attendance process was streamlined using QR technology, making it efficient and user-friendly. Developed a **Flutter** app with an Admin Panel built in **Express.js**.

Fast Recharge Web *Sep 2023*
A B2B recharge platform was created, focusing on affordability and ease of use for business clients. Competitive margin plans were implemented to attract more customers. Developed a Flutter app with an Admin Panel built in PHP.

Discount Recharge *Dec 2023*
A platform offering discounted recharge services was launched to improve affordability for users. The recharge process was simplified, making it more accessible and convenient. Developed a Flutter app with an Admin Panel developed in PHP.
